Thin Solid Films 304 (1997) 394–399

thin solid films

Subject Index of Volume 304

Adhesion
An X-ray diffraction (XRD) study of vapor deposited gold thin films on aluminum nitride (AlN) substrates, 229
Advanced solar reflector
Optical performance and durability of solar reflectors protected by an alumina coating, 303
AFM
Growth phenomena of $Bi_2Sr_2CaCu_2O_{8+\delta}$ thin films deposited on (110) oriented $SrTiO_3$ substrates, 212
Alumina
Optical performance and durability of solar reflectors protected by an alumina coating, 303
Aluminium nitride
Nanostructure and local chemical composition of AlN–Si_3N_4 layers grown by LPCVD, 256
Aluminium oxide
Nanoindentation of amorphous aluminum oxide films. III. The influence of the substrate on the elastic properties, 70
Aluminum nitride (AlN) substrate
An X-ray diffraction (XRD) study of vapor deposited gold thin films on aluminum nitride (AlN) substrates, 229
Aluminum oxide
Chemical vapor deposition of Al_2O_3 films using highly volatile single sources, 222
Amorphous hydrogenated carbon
Laser-ablation Fourier-transform mass spectrometry of films based on amorphous hydrogenated carbon, 130
Amorphous materials
Electrode limited currents in amorphous Ge–S–Ga thin films, 315
Atomic force microscopy (AFM)
Molecular structure of dipalmitoylphosphatidylcholine Langmuir-Blodgett monolayers studied by atomic force microscopy, 327
Atomic hydrogen
ITO surface ball formation induced by atomic hydrogen in PECVD and HW-CVD tools, 123
Atomic oxygen
Plasma etching and patterning of CVD diamond at $< 100°C$ for microelectronics applications, 245
Avalanche multiplication
Regenerative switching phenomenon of a graded $Al_xGa_{1-x}As$/InGaAs/GaAs heterostructure, 201
Band structure
Electrode limited currents in amorphous Ge–S–Ga thin films, 315
Barrier lowering effect
Regenerative switching phenomenon of a graded $Al_xGa_{1-x}As$/InGaAs/GaAs heterostructure, 201
BiSrCaCuO
Growth phenomena of $Bi_2Sr_2CaCu_2O_{8+\delta}$ thin films deposited on (110) oriented $SrTiO_3$ substrates, 212
Carbon
Shielded arc ion plating and structural characterization of amorphous carbon nitride thin films, 183
CdSSe
Studies on chemically deposited cadmium sulphoselenide (CdSSe) films, 56
Ceramics
Study of the influence of oxygen on the composition of thin films obtained by r.f. sputtering from a $Ca_5(PO_4)_3OH$ target, 191
Chalcogens
Lateral self-diffusion of selenium in $CuInSe_2$ thin films, 365
Chemical bath deposition
Studies on chemically deposited cadmium sulphoselenide (CdSSe) films, 56
Chemical vapor deposition
Chemical vapor deposition of Al_2O_3 films using highly volatile single sources, 222
Chemical vapor deposition (CVD)
Three-dimensional morphological instabilities in chemical vapor deposition films, 371
Chemical vapour deposition
Characterization of electron cyclotron resonance source plasma for etching and deposition, 294
Deposition of $LiTaO_3$ thin films by pyrosol process, 239
Iteratively derived optical constants of MoO_3 polycrystalline thin films prepared by CVD, 39
Two-component phthalocyanine films: impedance study, 36
Chemical vapour deposition (CVD)
Initial growth phase of diamond thin films observed by thermal emission spectrometry, 98
Cleavage
Thin solid film sample preparation by a small-angle cleavage for transmission electron microscopy, 157
Coatings
A simple in-situ optical film thickness monitor for infrared coatings, 24
Cobalt
Durable giant magnetoresistive sensors using Co/Cu superlattices, 333
Conductivity
Electrode limited currents in amorphous Ge–S–Ga thin films, 315
Magnetoresistance of granular ferromagnet–insulator films, 319
Confinement effect
Regenerative switching phenomenon of a graded $Al_xGa_{1-x}As$/InGaAs/GaAs heterostructure, 201
Contacts
High aspect ratio contacts: A review of the current tungsten plug process, 1
Copper
Durable giant magnetoresistive sensors using Co/Cu superlattices, 333
Crystallisation
Crystallisation of thin anatase coatings on muscovite, 204
Crystal orientation
Growth phenomena of $Bi_2Sr_2CaCu_2O_{8+\delta}$ thin films deposited on (110) oriented $SrTiO_3$ substrates, 212

Elsevier Science S.A.

Cyclotron resonance studies
Characterization of electron cyclotron resonance source plasma for etching and deposition, 294
Defects
An X-ray diffraction (XRD) study of vapor deposited gold thin films on aluminum nitride (AlN) substrates, 229
Deposition process
Deposition of $LiTaO_3$ thin films by pyrosol process, 239
Effects of wavelength, deposition rate and thickness on laser ablation deposited YSZ films on Si(100), 225
Electrode limited currents in amorphous Ge–S–Ga thin films, 315
Study of the influence of oxygen on the composition of thin films obtained by r.f. sputtering from a $Ca_5(PO_4)_3OH$ target, 191
The characterization of undoped SnO_x thin film grown by reactive ion-assisted deposition, 85
Depth profiling
Chemical vapor deposition of Al_2O_3 films using highly volatile single sources, 222
Diamond
Axial distribution of emission and rate of deposition of diamond-like film in r.f. discharges in CH_4, 136
Initial growth phase of diamond thin films observed by thermal emission spectrometry, 98
PEELS and EXELFS characterization of diamond films grown by the HF-CVD technique on non-scratched Si substrates, 45
Plasma etching and patterning of CVD diamond at $< 100°C$ for microelectronics applications, 245
Diffusion
Lateral self-diffusion of selenium in $CuInSe_2$ thin films, 365
Three-dimensional morphological instabilities in chemical vapor deposition films, 371
Doping
Interdiffusion in CoN/CN soft X-ray multilayer mirrors, 278
Elastic deformations
A 'hydrostatic core' model of elastic deformations in an indented film/substrate system, 78
Elastic properties
Nanoindentation of amorphous aluminum oxide films. III. The influence of the substrate on the elastic properties, 70
Electrical properties and measurements
Magnetoresistance of granular ferromagnet–insulator films, 319
Electrochemical characteristics
Electrochemical and optical characteristics of conducting poly(*o*-toluidine) films, 65
Electrochemistry
Optical and electrochemical characteristics of sol–gel deposited tungsten oxide films: a comparison, 310
Electron energy loss spectroscopy
Nanostructure and local chemical composition of AlN–Si_3N_4 layers grown by LPCVD, 256
PEELS and EXELFS characterization of diamond films grown by the HF-CVD technique on non-scratched Si substrates, 45
Electron spectroscopy
Tantalum plasma etching with minimum effect on underlying nickel–iron thin film, 381
Ellipsometry
Optical and electrochemical characteristics of sol–gel deposited tungsten oxide films: a comparison, 310
Epitaxy
Effects of wavelength, deposition rate and thickness on laser ablation deposited YSZ films on Si(100), 225
Texture development of evaporated nickel films on molybdenum substrates, 170
Etching
Characterization of electron cyclotron resonance source plasma for etching and deposition, 294
FeCo coatings
Effect of microstructure on the wear behaviour of Fe–Co thin films, 61
Ferromagnet–insulator mixture films
Magnetoresistance of granular ferromagnet–insulator films, 319
Films
Metal–organic vapor deposition of YSZ electrolyte layers for solid oxide fuel cell applications, 106
Fourier–transform mass spectrometry
Laser-ablation Fourier-transform mass spectrometry of films based on amorphous hydrogenated carbon, 130
Gas sensors
Properties and mechanism study of Ag doped SnO_2 thin films as H_2S sensors, 13
Giant magnetoresistance
Magnetoresistance of granular ferromagnet–insulator films, 319
Gold film
An X-ray diffraction (XRD) study of vapor deposited gold thin films on aluminum nitride (AlN) substrates, 229
Growth mechanism
A surface EXAFS study of thin nickel deposits on (110) TiO_2 surfaces, 267
Initial growth phase of diamond thin films observed by thermal emission spectrometry, 98
Hardness
Shielded arc ion plating and structural characterization of amorphous carbon nitride thin films, 183
High-resolution electron microscopy
Nanostructure and local chemical composition of AlN–Si_3N_4 layers grown by LPCVD, 256
HRTEM
Growth phenomena of $Bi_2Sr_2CaCu_2O_{8+\delta}$ thin films deposited on (110) oriented $SrTiO_3$ substrates, 212
Hydrogen sulphide
Properties and mechanism study of Ag doped SnO_2 thin films as H_2S sensors, 13
Indium tin oxide
ITO surface ball formation induced by atomic hydrogen in PECVD and HW-CVD tools, 123
Infrared film thickness monitor
A simple in-situ optical film thickness monitor for infrared coatings, 24
Interdiffusivity
Interdiffusion in CoN/CN soft X-ray multilayer mirrors, 278
Iodine
Comparison of the properties of iodine-doped poly(*N*-vinylcarbazole) (PVK) thin films obtained by evaporation of pure powder followed by iodine post-deposition doping and iodine pre-doped powder, 16
Ion-beam-assisted deposition (IBAD)
Optical performance and durability of solar reflectors protected by an alumina coating, 303
Ion implantation
Transmission electron microscopic studies of ternary FeNi–silicide layers prepared by metal vapour vacuum arc ion implantation, 196
Ion plating
Shielded arc ion plating and structural characterization of amorphous carbon nitride thin films, 183
Langmuir–Blodgett films (LB films)
Preparation and structure of lanthanum stearate films, 323
Langmuir-Blodgett films (LB films)
Molecular structure of dipalmitoylphosphatidylcholine Langmuir-Blodgett monolayers studied by atomic force microscopy, 327
Laser ablation
Effects of wavelength, deposition rate and thickness on laser ablation deposited YSZ films on Si(100), 225

Laser irradiation
Changes in photoluminescence behaviour and structure of porous silicon related to preparation conditions and laser irradiation, 358
Luminescence
Changes in photoluminescence behaviour and structure of porous silicon related to preparation conditions and laser irradiation, 358
Quantum size effect does not yield photoluminescence in nanometer silicon crystals, 353
Magnetic properties and measurements
Growth, structural characteristics and magnetoresistance in La–Ca–Mn–O thin films prepared by dc magnetron sputtering, 386
Magnetoresistance of granular ferromagnet–insulator films, 319
Mean-field
Monte-Carlo simulation of mixed multilayer adsorption, 344
Metallization
High aspect ratio contacts: A review of the current tungsten plug process, 1
Methane
Axial distribution of emission and rate of deposition of diamond-like film in r.f. discharges in CH_4, 136
MgF_2
Preparation and characterization of MgF_2 thin film by a trifluoroacetic acid method, 252
Mica
Crystallisation of thin anatase coatings on muscovite, 204
Microstructure
Effect of microstructure on the wear behaviour of Fe–Co thin films, 61
Preparation and characterization of MgF_2 thin film by a trifluoroacetic acid method, 252
Microwave plasma
Plasma etching and patterning of CVD diamond at $< 100°C$ for microelectronics applications, 245
MOCVD
Metal–organic vapor deposition of YSZ electrolyte layers for solid oxide fuel cell applications, 106
MOCVD process
Synthesis and characterization of organometallic precursors for the preparation of Sn/chalcogenide heterostructures, 144
Molecular beam deposition
Thin pyrite (FeS_2) films by molecular beam deposition, 178
Molecular orientation
Determination of the orientation of CuPc film by Raman spectroscopy, 166
Molybdenum oxide
Iteratively derived optical constants of MoO_3 polycrystalline thin films prepared by CVD, 39
Monolayers
Molecular structure of dipalmitoylphosphatidylcholine Langmuir-Blodgett monolayers studied by atomic force microscopy, 327
Monte-Carlo simulation
Monte-Carlo simulation of mixed multilayer adsorption, 344
Multilayer
Monte-Carlo simulation of mixed multilayer adsorption, 344
Multilayers
Durable giant magnetoresistive sensors using Co/Cu superlattices, 333
Interdiffusion in CoN/CN soft X-ray multilayer mirrors, 278
Preparation and structure of lanthanum stearate films, 323
Nanoindentation
A 'hydrostatic core' model of elastic deformations in an indented film/substrate system, 78
Nanoindentation of amorphous aluminum oxide films. III. The influence of the substrate on the elastic properties, 70
Nanostructure
Quantum size effect does not yield photoluminescence in nanometer silicon crystals, 353
Nanostructures
Changes in photoluminescence behaviour and structure of porous silicon related to preparation conditions and laser irradiation, 358
Negative differential resistance (NDR)
Regenerative switching phenomenon of a graded $Al_xGa_{1-x}As$/InGaAs/GaAs heterostructure, 201
Nichrome alloy
Study of a polycrystalline Ni/Cr alloy V. Hydrogen-atom exposure, 273
Nickel
A surface EXAFS study of thin nickel deposits on (110) TiO_2 surfaces, 267
Texture development of evaporated nickel films on molybdenum substrates, 170
Nitride
Shielded arc ion plating and structural characterization of amorphous carbon nitride thin films, 183
Nitrides
An XRD study of highly textured HfN films, 286
Optical characteristics
Electrochemical and optical characteristics of conducting poly(*o*-toluidine) films, 65
Optical properties
A simple in-situ optical film thickness monitor for infrared coatings, 24
Iteratively derived optical constants of MoO_3 polycrystalline thin films prepared by CVD, 39
Optical and electrochemical characteristics of sol–gel deposited tungsten oxide films: a comparison, 310
Structural and optical properties of amorphous hydrogenated fluorinated carbon films produced by PECVD, 149
Optical spectroscopy
Axial distribution of emission and rate of deposition of diamond-like film in r.f. discharges in CH_4, 136
Initial growth phase of diamond thin films observed by thermal emission spectrometry, 98
Structural and optical properties of amorphous hydrogenated fluorinated carbon films produced by PECVD, 149
Organic substances
Preparation and structure of lanthanum stearate films, 323
Organometallic precursors
Synthesis and characterization of organometallic precursors for the preparation of Sn/chalcogenide heterostructures, 144
Organometallic vapor deposition
Chemical vapor deposition of Al_2O_3 films using highly volatile single sources, 222
Oxides
Iteratively derived optical constants of MoO_3 polycrystalline thin films prepared by CVD, 39
Oxygen
Study of the influence of oxygen on the composition of thin films obtained by r.f. sputtering from a $Ca_5(PO_4)_3OH$ target, 191
PECVD
ITO surface ball formation induced by atomic hydrogen in PECVD and HW-CVD tools, 123
Phase transitions
Transmission electron microscopic studies of ternary FeNi–silicide layers prepared by metal vapour vacuum arc ion implantation, 196
Physical vapour deposition (PVD)
Texture development of evaporated nickel films on molybdenum substrates, 170
Plasma etching
Plasma etching and patterning of CVD diamond at $< 100°C$ for microelectronics applications, 245
Plasma processing and deposition
Axial distribution of emission and rate of deposition of diamond-like film in r.f. discharges in CH_4, 136

Characterization of electron cyclotron resonance source plasma for etching and deposition, 294
Structural and optical properties of amorphous hydrogenated fluorinated carbon films produced by PECVD, 149
Polycarbozole
Comparison of polycarbazole obtained by oxidation of carbazole either in solution or in thin film form, 48
Polycrystalline
Study of a polycrystalline Ni/Cr alloy V. Hydrogen-atom exposure, 273
Thin pyrite (FeS_2) films by molecular beam deposition, 178
Polymer thin films
A real-time poling approach for preparing second-order nonlinear optical polymer thin films, 299
Post–doping
Comparison of the properties of iodine-doped poly(*N*-vinylcarbazole) (PVK) thin films obtained by evaporation of pure powder followed by iodine post-deposition doping and iodine pre-doped powder, 16
Pre–doped powder
Comparison of the properties of iodine-doped poly(*N*-vinylcarbazole) (PVK) thin films obtained by evaporation of pure powder followed by iodine post-deposition doping and iodine pre-doped powder, 16
Pulsed laser evaparation
Growth of CdMnS films by pulsed laser evaporation, 28
Pyrolysis
Deposition of $LiTaO_3$ thin films by pyrosol process, 239
Quantum well
Regenerative switching phenomenon of a graded $Al_xGa_{1-x}As$/InGaAs/GaAs heterostructure, 201
Radioactive tracer techniques
Lateral self-diffusion of selenium in $CuInSe_2$ thin films, 365
Raman scattering
Quantum size effect does not yield photoluminescence in nanometer silicon crystals, 353
Raman spectroscopy
Determination of the orientation of CuPc film by Raman spectroscopy, 166
Regenerative-loop feedback
Regenerative switching phenomenon of a graded $Al_xGa_{1-x}As$/InGaAs/GaAs heterostructure, 201
Residual stress
Effect of microstructure on the wear behaviour of Fe–Co thin films, 61
Second harmonic generation (SHG)
A real-time poling approach for preparing second-order nonlinear optical polymer thin films, 299
Segregation
Lateral self-diffusion of selenium in $CuInSe_2$ thin films, 365
Semiconductors
Properties and mechanism study of Ag doped SnO_2 thin films as H_2S sensors, 13
Sensors
Chemical composition and crystalline structure of SnO_2 thin films used as gas sensors, 113
Durable giant magnetoresistive sensors using Co/Cu superlattices, 333
Magnetoresistance of granular ferromagnet–insulator films, 319
Two-component phthalocyanine films: impedance study, 36
Silicides
Transmission electron microscopic studies of ternary FeNi–silicide layers prepared by metal vapour vacuum arc ion implantation, 196
Silicon
Changes in photoluminescence behaviour and structure of porous silicon related to preparation conditions and laser irradiation, 358
Quantum size effect does not yield photoluminescence in nanometer silicon crystals, 353
Silicon nitride
Nanostructure and local chemical composition of AlN–Si_3N_4 layers grown by LPCVD, 256
Single crystal diamond etching
Plasma etching and patterning of CVD diamond at $< 100°C$ for microelectronics applications, 245
SnO_2
CO sensing properties of SnO_2 thin films prepared by the sol–gel process, 339
SOFC
Metal–organic vapor deposition of YSZ electrolyte layers for solid oxide fuel cell applications, 106
Soft X-ray
Interdiffusion in CoN/CN soft X-ray multilayer mirrors, 278
Solar selective surfaces
Laser-ablation Fourier-transform mass spectrometry of films based on amorphous hydrogenated carbon, 130
Sol–gel process
CO sensing properties of SnO_2 thin films prepared by the sol–gel process, 339
Solution
Comparison of polycarbazole obtained by oxidation of carbazole either in solution or in thin film form, 48
Sputtering
An XRD study of highly textured HfN films, 286
Growth, structural characteristics and magnetoresistance in La–Ca–Mn–O thin films prepared by dc magnetron sputtering, 386
Study of the influence of oxygen on the composition of thin films obtained by r.f. sputtering from a $Ca_5(PO_4)_3OH$ target, 191
Strain
An X-ray diffraction (XRD) study of vapor deposited gold thin films on aluminum nitride (AlN) substrates, 229
Stress
An XRD study of highly textured HfN films, 286
Structural properties
Growth, structural characteristics and magnetoresistance in La–Ca–Mn–O thin films prepared by dc magnetron sputtering, 386
Superconductor thin film
Growth phenomena of $Bi_2Sr_2CaCu_2O_{8+\delta}$ thin films deposited on (110) oriented $SrTiO_3$ substrates, 212
Surface composition
Chemical composition and crystalline structure of SnO_2 thin films used as gas sensors, 113
Surface diffusion
Three-dimensional morphological instabilities in chemical vapor deposition films, 371
Surface morphology
Chemical composition and crystalline structure of SnO_2 thin films used as gas sensors, 113
Three-dimensional morphological instabilities in chemical vapor deposition films, 371
Surface structure
Molecular structure of dipalmitoylphosphatidylcholine Langmuir-Blodgett monolayers studied by atomic force microscopy, 327
Tantalum
Tantalum plasma etching with minimum effect on underlying nickel–iron thin film, 381
Thermal effects
X-ray photon and thermal effects on trimethylsilane covered Si(100) surfaces, 160
Thin film
Comparison of polycarbazole obtained by oxidation of carbazole either in solution or in thin film form, 48
Preparation and characterization of MgF_2 thin film by a trifluoroacetic acid method, 252
Thin solid films
Thin solid film sample preparation by a small-angle cleavage for transmission electron microscopy, 157

Tin oxide
Chemical composition and crystalline structure of SnO_2 thin films used as gas sensors, 113
Properties and mechanism study of Ag doped SnO_2 thin films as H_2S sensors, 13
The characterization of undoped SnO_x thin film grown by reactive ion-assisted deposition, 85
Titanium
High aspect ratio contacts: A review of the current tungsten plug process, 1
Titanium oxide
A surface EXAFS study of thin nickel deposits on (110) TiO_2 surfaces, 267
Crystallisation of thin anatase coatings on muscovite, 204
Transmission electron microscopy (TEM)
An X-ray diffraction (XRD) study of vapor deposited gold thin films on aluminum nitride (AlN) substrates, 229
Transmission electron microscopy
Thin solid film sample preparation by a small-angle cleavage for transmission electron microscopy, 157
Transmission electron microscopic studies of ternary FeNi–silicide layers prepared by metal vapour vacuum arc ion implantation, 196
Transmittance
Preparation and characterization of MgF_2 thin film by a trifluoroacetic acid method, 252
Trifluoroacetic acid
Preparation and characterization of MgF_2 thin film by a trifluoroacetic acid method, 252
Tungsten
High aspect ratio contacts: A review of the current tungsten plug process, 1
Tungsten oxide
Optical and electrochemical characteristics of sol–gel deposited tungsten oxide films: a comparison, 310
Wear
Effect of microstructure on the wear behaviour of Fe–Co thin films, 61
X-ray absorption
A surface EXAFS study of thin nickel deposits on (110) TiO_2 surfaces, 267
X-ray diffraction
An XRD study of highly textured HfN films, 286
Crystallisation of thin anatase coatings on muscovite, 204
Deposition of $LiTaO_3$ thin films by pyrosol process, 239
Growth, structural characteristics and magnetoresistance in La–Ca–Mn–O thin films prepared by dc magnetron sputtering, 386
Preparation and structure of lanthanum stearate films, 323
Texture development of evaporated nickel films on molybdenum substrates, 170
X-ray line broadening
An X-ray diffraction (XRD) study of vapor deposited gold thin films on aluminum nitride (AlN) substrates, 229
X-ray photoelectron spectroscopy
Structural and optical properties of amorphous hydrogenated fluorinated carbon films produced by PECVD, 149
X-ray photon
X-ray photon and thermal effects on trimethylsilane covered Si(100) surfaces, 160
XRD
Growth phenomena of $Bi_2Sr_2CaCu_2O_{8+\delta}$ thin films deposited on (110) oriented $SrTiO_3$ substrates, 212
ITO surface ball formation induced by atomic hydrogen in PECVD and HW-CVD tools, 123
X-ray diffraction (XRD)
Growth of CdMnS films by pulsed laser evaporation, 28
YSZ
Metal–organic vapor deposition of YSZ electrolyte layers for solid oxide fuel cell applications, 106
